### Certificate course in "Chemistry and Employability"

Course details:

This certificate course was offered to students of B.Sc. Chemistry in the Second Term from date 12/07/2019 to 19/10/2019comprising of thirty hours. The syllabus and method of assessment was discussed and decided in the meeting of Ad-hoc Board on dated 28/06/2019 .For this course-10 students registered. Prof. M. B. Zade and Prof. M. B. Motegaonkar conducted the theory classes. After completion of the certificate course the short answer based theory examinations was conducted for which all students appeared and out of them all students get passed. The average percentage of passing is 100%.
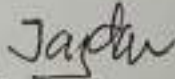

Outcome:

The aim of the certificate course was to familiarize the students with the differenttypes of Measurement Techniques. As an outcome it is found that the students who have completedsuccessfullythis course are found to become familiar with Industry basedbasic knowledge.

DEPARTMENT OF ELECTRONICS
CERTIFICATE COURSE IN
Testing Electronic components
(01/07/2019 TO 20/08/2019)

The course is applied to impart the knowledge of Testing Electronic components in various fields of science as concern to marketing. It is essential that an electronic component passes the testing stage if it is to be made for mass production. Using a system ensures that technical errors can be found and determines whether it meets quality compliance. Quality testing professionals ensure that standards are met from the processing stage right through to the final release, ensuring that any defects are found as early as possible and any problems are solved. Experts can develop tests to evaluate the level of quality control on the manufacturing floor. All test procedures are reviewed prior to their use by the Company as part of the Quality assurance system. Testing also involves any inspections of outbound products leaving the factory. This will prevent any products leaving the factory which are defected and stop them from reaching the hands of the consumer. During this year's our department were made aware that certain test of equipment will perform. There followed an investigation into the type of equipment required and the best source for obtaining it.

Electronic components pass quality assurance during the manufacturing stage and the product is tested at the end of manufacturing as a confirmation to companies that they can be assured of the quality of the product once it reaches the consumer.

Outcome: Testing technique is very important in the modern world because it is used in many fields, most notably measurement, where it is used to give high accuracy results in measuring electronics component. Keeping this view, we decide to start a certificate course for students to get the placement in various companies as a quality controller.

Summary Report with Outcome
For
Certificate course in "Insurance Mathematics"

Course details:

This certificate course was offered to students of B.Sc. Mathematics in the Second Term form date 20/12/2019 to 25/03/2020 comprising of thirty hours. The syllabus and method of assessment was discussed and decided in the meeting of Ad-hoc Board on dated 01/07/2017 for these course 19 students registered. Dr. S.V.Badgire & Prof. M. G. Mahamure conducted the theory classes. After completion of the certificate course the MCQ based theory examinations was conducted for which 19 students appeared and out of them 16 number of students get passed. The average percentage of passing is 84%

Outcome:

The aim of the certificate course was to familiarize the students with the Insurance Mathematics and their applications. As an outcome it is found that the students who have completed successfully this course are found to

- apply logical, analytical, and abstract thinking when solving practical problems
- understand general theoretical principles of mathematical methods
- apply analytical and optimization methods to solving practical problems
- solve problems in banking and insurance and interpret results in practice
- implement methods on computer and work with data sets
- use modern mathematical tools for computations in problems of insurance mathematics

2018-2019

AZAD MAHAVIDYALAYA, AUSA
DEPARTMENT OF PHYSICS

CERTIFICATE COURSE IN BASIC ELECTRONICS
(05/08/2018 TO 30/09/2018)

About this Course

Electronics is widely used in information processing, telecommunication, and signal processing. The ability of electronic devices to act as switches makes digital information-processing possible. ... As of 2019 most electronic devices use semiconductor components to perform electron control.

This course introduces students to the basic components of electronics: diodes, transistors, and op amps. It covers the basic operation and some common applications.

This course is helpful for learners who want to understand the fundamentals of electronics, as well as the history of electronics.

Course learning outcomes

After studying this course, you should be able to:

- recognize a variety of exciting high-tech products and systems enabled by electronics
- manipulate voltages, currents and resistances in electronic circuits
- demonstrate familiarity with basic electronic components and use them to design simple electronic circuits

AZAD MAHAVIDYALAYA, AUSA
DEPARTMENT OF PHYSICS

CERTIFICATE COURSE IN
Lasers and Their Application
(01/01/2018 TO 28/02/2018)

The course is intended to impart the knowledge of lasers and their application to various fields of science and technology.

Laser is recognized as one of the top technological achievements of 20th century and there are few areas in technology that are not influenced by it. It plays an important role in, medicine, industry, and entertainment has resulted in fiber-optic communication, CDs, CD-ROMs, and DVDs. Without lasers there would be no supermarket bar code readers, certain life-saving cancer treatments, or precise navigation techniques for commercial aircraft. Laser is acronym of Light Amplification by Stimulated Emission of Radiation. Laser is a source of light but it is different from other light sources. Laser makes a high intensity and extremely directional beam which has a narrow frequency range. Lasers are more used as a strong electromagnetic beam than a light beam.

Laser technology is very important in the modern world because it is used in many fields, most notably measurement, where it is used to give high accuracy results in measuring small and large distances. Laser technology is also used for the purposes of generating heat in industrial cutting processes.

The medical field uses it in surgical procedures. The laser is used effectively in the treatment of gallbladder and kidney stones. The laser light intensity at focus is too high and the material response becomes non-linear. The laser produces short pulses of light and it is possible to obtain nanosecond electric pulses (nsEPs) from several lasers. By using the mode-locking technique, it can display the width of shorter pulses - for a few hundred femtoseconds.

Certificate course in "Aquarium Fabrication"

Course Details:

This Certificate course was offered to the students of B.Sc. Fishery in the first term from date 17/07/2017 to 30/08/2017 comprising of 45 hours. The syllabus and method of assessment was discussed and decided in the meeting of Ad-hoc Board on dated 28/06/2017. For this course 8 students registered. Dr. Korde S. S. conducted the Theory and Practical Classes. After completion of the certificate course the short answer bases theory examination was conducted for which all students (08) appeared and out of them all students get passed. The average percentage of passing is 100%.

Outcome: The aim of the certificate course was to familiarize students with the different types of aquarium and their fabrication. As an outcome it is found that the students who have completed successfully this course are found to become familiar with skill based basic knowledge of aquarium fabrication.

Summary Report with Outcome
For
Certificate course in "Role of Mathematics in Medical physics"

Course details:

This certificate course was offered to students of B.Sc. Mathematics in the Second Term form date 25/12/2017 to 30/03/2018 comprising of thirty hours. The syllabus and method of assessment was discussed and decided in the meeting of Ad-hoc Board on dated 01/07/2017 for these course 20 students registered. Dr. S.V.Badgire Prof. M. G. Mahamure and Prof. D.A. Mitkari conducted the theory classes. After completion of the certificate course the MCQ based theory examinations was conducted for which 20 students appeared and out of them 13 number of students get passed. The average percentage of passing is 65%.

Outcome:

The aim of the certificate course was to familiarize the students with the Role of Mathematics in Medical physics and their applications. As an outcome it is found that the students who have completed successfully this course are found to

- ❖ Learn and understand calculus. Starting with review of differentiation, exponential and logarithm functions, trigonometric functions, plotting functions, differentials and basics of integration.
- ❖ Understand basics of vector calculus.
- ❖ Understand basics of matrices and determinants
- ❖ Understand differential equations.

Objectives:

हिंदी में प्रयोजनमूलक हिन्दी शब्द ' functional language ' के रूप में प्रयुक्त किया जा रहा है, जिसका तात्पर्य है- जीवन की विभिन्न आवश्यकताओं की पूर्ति के लिए उपयोग में लायी जाने वाली भाषा। इसका प्रमुख लक्ष्य जीविकोपार्जन का साधन बनना होता है।

यह हिंदी साहित्य तक सीमित नही है, बल्कि प्रशासन, कार्यालय, मीडिया, बैंक, विधि, कृषि, वाणिज्य, तकनीकी, विज्ञापन, विज्ञान, शैक्षिक आदि विभिन्न क्षेत्रों में प्रयोग में ली जा रही है। विभिन्न व्यवसायों से संबंधित व्यक्तियों जैसे- डॉक्टर, वकील, पत्रकार, मीडियाकर्मी, व्यापारी, किसान, वैज्ञानिक आदि के कार्य-क्षेत्रों में प्रयुक्त भाषा ही 'प्रयोजनमूलक' भाषा कहलाती है।

प्रयोजनमूलक हिंदी के विभिन्न उद्देश्य : [Objectives]

1 - हिंदी की व्यावहारिक उपयोगिता से परिचित कराना।

2 - स्वयं रोजगार उपलब्ध कराने में युवकों की मदद करना।

3 - विविध सेवा-क्षेत्रों में युवक-युवतियों को सेवा के अवसर उपलब्ध करा देना।

4 - रोजी-रोटी की समस्या हल करने में छात्र सक्षम हो, इस दृष्टि से उसका पाठ्यक्रम तैयार करना।

5 - अनुवाद कार्य को बढ़ावा देना तथा इसके जरिए सफल अनुवादक तैयार करना।

6 - कार्यालयों में प्रयुक्त होने वाली हिंदी भाषा का समय ज्ञान प्रदान करना।

7 - दफ्तरी भाषा की पारिभाषिक शब्दावली बनाना तथा उसमें कौशल हसिल करना।

8 - तकनीकी भाषा की परिभाषिक शब्दावली तैयार करना तथा उसमें निपुणता प्राप्त करना।

9 - साक्षात्कार, वार्तालाप, संभाषण आदि विषयक ज्ञानात्मक कौशल के विकास हेतु प्रयास करना।

10 - शिक्षण-प्रशिक्षण के माध्यम के रूप में हिंदी को सक्षम बनाना।

11 - जनसंचार के साधनों के अनुकूल बनाने हेतु हिंदी को विकसित करना।

12 - राष्ट्रभाषा के प्रचार एवं प्रसार के दायित्व का निर्वहन करना।

13 - राष्ट्र तथा राष्ट्रभाषा के प्रति अपनी अस्मिता जीवित रखना।

14 - सामाजिक तथा राष्ट्रीय आवश्यकताओं की संपूर्ति करना।
