Fish Diseases Management

Topic-types of fish disease- Gyrodactylosis

By

Dr. Konde Seema

### Gyrodactylus

- Causing organism: Causing organism is the trematode Parasite *Gyrodactylus* and disease is called as Gyrodactylosis .
- It is a small monogenean (about 0.5 mm long) obligate ectoparasite affecting the most species of freshwater fishes characterized by destruction of the skin or rarely the gills.
- There are several species from *Gyrodactylus* which are affecting the skin, fins and rarely on the gills. Such as *G. ganvilleae*, *G. salmoni*, *G. ictaluri*, *G. cyprini*, *G. salaries* etc. The species of the genus *Gyrodactylus* are small in size less than 1mm.

Paper No — VIII**

**Fish Preservation and Fish by product Technology  
Unit-I : Fish Spoilage  
Topic—Causes of Fish Spoilage**

**By  
Dr. Korde Seema**

### **Causes of Spoilage in Fish**

- Fish is a highly perishable commodity. The spoilage of fish begins as soon as fish dies.
- In tropical conditions, fish spoils quite rapidly, within a few hours of landing, if not properly cooled. The spoilage rate of fish may be reduced by good handling practices and effective temperature control from very beginning.
- Off odor and off flavor, slime, gas production, discoloration and soft texture are the signs of spoilage. Component involved in spoilage process are protein, lipids, carbohydrates, nucleotides and other non-protein nitrogen compounds.
- The rate of spoilage is temperature dependent and lowering the temperature will reduce the rate of spoilage. In raw fish, spoilage takes place mainly due to three reason viz.,
  - 1) Enzymatic action
  - 2) Microbial action
  - 3) Chemical action

**Fish Seed Production Technology & Hatcheries  
Management**

**Unit-I Topics-Natural fish seed collection**

**By**

**Dr. Korde Seema**

**Natural fish Seed Collection**

- 1) Spawn resources investigations Technique:-**
- The technique of spawn collection from rivers essentially consists of operating fixed filtration nets in marginal areas of flooded rivers during monsoon months, when the Indian major carps normally breed.
- Success of operations mainly depends on proper sites, suitable nets, monsoon flooding patterns, availability of sufficient brood stock and the success of spawning. Before collection procedures are undertaken, spawn prospecting investigations are carried out to identify potential centres for egg, spawn, fry or fingerling.
- The expert team of spawn collection is called as Sawar who make the survey of rivers and locate the site of seed collection.

B.Sc Second Year 2021-22  
Semester II<sup>th</sup>

## Operating System

### Introduction:-

An operating system is a software programme required to manage and operate all computing devices like smartphone, laptop, computer, server, supercomputer, mainframe, mini-computer, etc. ... It is a layer of graphical user interface (GUI), which acts as a platform between the user and the computer hardware.

Some of the most common operating systems are Microsoft Windows, Apple macOS, Linux, Android and Apple's iOS.

## Unit 3

### Process Concept:-

A process is basically a program in execution. The execution of a process must progress in a sequential fashion. A process is defined as an entity which represents the basic unit of work to be implemented in the system.

# Powerpoint

---

B.Sc Third Year 2021-22  
Semester Vth

---

## Software Engineering

Software is a program or set of programs containing instructions that provide desired functionality. And Engineering is the process of designing and building something that serves a particular purpose and finds a cost-effective solution to problems.  
Software Engineering is a systematic, disciplined, quantifiable study and approach to the design, development, operation, and maintenance of a software system.

---

## Unit III<sup>rd</sup> Understanding Requirements And Design Concept

### Requirement Engineering

Requirements engineering (RE) refers to the process of defining, documenting, and maintaining requirements in the engineering design process. Requirements engineering provides the appropriate mechanism to understand what the customer desires, analyzing the need, and assessing feasibility, negotiating a reasonable solution, specifying the solution clearly, validating the specifications and managing the requirements as they are transformed into a working system. Thus, requirements engineering is the discipline application of proven principles, methods, tools, and notation to describe a proposed system's intended behavior and its associated constraints.

## PREFACE

Authors take Pleasure in presenting prestigious publication "Chemistry text book" this text book has been thoroughly revised and designed according to the new NEP syllabus of S.R.T.M.U. Nanded . The book now adequately covers all the topics of B.Sc. first year first semester

This text book provides simple language comprehensive treatment to the B.Sc.F.Y. I semester students. We have opportunity of discussing syllabus content with several eminent teachers of Organic and Inorganic Chemists during the preparation of this book.

We take this opportunity to express our sincere thanks to all the students and fellow teachers who took pains to send us valuable pains to send us their valuable suggestion and critism for further improvement of this text book.

Author thankful to principal . I grateful to our colleagues

**Module: I An introduction to Organic reactions ... 07**

- 1.1 Basic terms: Substrate and Reagents, types of reagents (Electrophilic and Nucleophilic). Notation of arrows: curved arrow, half headed arrow, double headed arrow, straight arrow.
- 1.2 Electronic displacement effects :- Inductive Effect , Resonance Effect And Hyperconjugation and their Applications in A) Acidic Strength B) Basic Strength
- 1.3 Bond fission: Homolytic and heterolytic fission.
- 1.4 Types of reactions and Reaction intermediates: Carbocation, Carbanion, Free radical, carbene, (Introduction, structure & Stability), nitrene & benzyne (only introduction)

**Module: 2 Aromatic Hydrocarbons and Aromaticity ... 26**

- 2.1 Introduction, Nomenclature, kekule and resonance structure of benzene, stability, Orbital picture of benzene.
- 2.2 Aromaticity, antiaromaticity and homoaromaticity by Huckel's Rule for homocyclic and heterocyclic compounds.
- 2.3 Electrophilic Substitution reaction of benzene (with mechanism): Nitration, Halogenation, Friedel Craft alkylation and acylation.
- 2.4 Orientation effect: Effect of activating and deactivating groups (-OH, NO<sub>2</sub>, CH<sub>3</sub>, Cl) on aromatic electrophilic (Nitration) substitution reaction (with mechanism).

**Module: 3 Alcohols, Epoxides and Phenols ... 49**

- 3.1 Alcohols: Introduction, Nomenclature and Classification.
- 3.2 Dihydric alcohol (ethylene glycol): Preparation methods:
  - i) Hydroxylation of alkene
  - ii) 1,2- dihaloalkane. Chemical reactions:
    - 1) Pb(OAc)<sub>4</sub>
    - 2) P<sub>2</sub>O<sub>5</sub>/ZnCl<sub>2</sub>
- 3.3 Trihydric alcohol (Glycerol): Preparation methods from: 1) Oils and fats 2) Propene. Chemical reactions: action of 1) Nitric acid, 2) Acetylchloride on trihydric alcohol.
- 3.4 Epoxides: Introduction and nomenclature. Preparation methods: a) Oxidation of ethene in presence of Ag catalyst, b) Epoxidation of ethene with peracetic acid.
- 3.5 Chemical reactions: a) Ring opening reactions of propylene oxide. a) Hydrolysis in acidic and basic medium. b) Action of Grignard reagent.
- 3.6 Phenols : Introduction, classification and acidic character of phenol (compare with ethanol). Chemical reactions with mechanism : Reimer-Tiemann reaction,

## Organic Synthesis Via Enolate

- A methylene group (-CH<sub>2</sub>) which is attached from both sides by electron withdrawing groups (e.g. -CHO, >C=O, -COOH, -COOR, -CN, -X etc.) is called active methylene group.

## Acidity of $\alpha$ -hydrogen

- The hydrogen atoms of active methylene group are acidic in nature
- The compounds containing active methylene group when treated with base, loses hydrogen atoms to form carbion.
- This carbion is stabilized by another resonance structure called as enolate ion.
